Your next cylinder is just 3 clicks away

1. SET UP your online account

To create an online account with us you just need your company details such as name, address and VAT number, as well as, a valid email address. Registration only takes a couple of minutes. After filling a simple form, you will receive an email with the link to activate your account! A voila!

3. SHOP for what you need whenever you want wherever you are

Onece the drawing approval stage is completed, you will be able to see the prices of the tooling, as well as, create the order and complete it online!

2. ADD

your machines & technical details

Finding the right, high-quality printing cylinders can be a challenge, especially to get them quickly and knowing that they're right for your machines. And that's exactly the reason why we ask you to add any machine you will be interested to purchase the tooling for to your account.

To make things easier we have created the list of machines we have produced for, so you can use our drop down menu and simply select the machines from your park.

Next, you need to either upload the technical drawings of tools you would like to buy, or select "contact us" to check if we have the drawing in our database.

About **us**

Rotometal is a leader among European rotary tooling suppliers. Over 15 years of experience has helped us build an invaluable knowledge base that allowed us to establish a strong position in an extremely demanding market.

Here at Rotometal, we aim for continuous and sustainable growth. Our mission is to supply top quality products, at an affordable price, within an industry leading time frame.

We are Inspired by Innovation

2021 seen us launching pioneering products and technologies such as IMAG, CRO GF or ANTIFRICTION. However, innovation does not end when a new idea is generated, nor does it stop when that idea is realized and ready for market.

That's why we believe that 2022/23 will be incredibly exciting for us and for you as we have even more innovation, improvements and ideas coming very soon.

> We are Inspired by Innovation, We are ROTOMETAL.

Grzegorz Dolbniak CEO Rotometal

Our strengths

Cutting units • Cutting technology Printing technology • Accessories

Our customers are mainly printers, but also the world's largest manufacturers of printing and converting machines. Most of the production is exported, but a large part of it remains in Poland. Precise workmanship, maintaining high quality of offered products at every stage of production, competitive price, have enabled the company to compete with the largest suppliers of this type of tools in the world.

Our strengths are:

- $\rightarrow\,$ Ability to form long-term partner relationships with our customers
- \rightarrow Providing optimal manufacturing technology
- ightarrow Great commitment to innovation
- → Having our own in-house Design Engineering department
- \rightarrow Machine park equipped in modern CNC machinery
- ightarrow Offering short lead times

NEW!

Aluminum Magnetic Cylinder

Rotometal introduces a new type of magnetic cylinder: MCA. It is a new product family that provides all the features of the standard MCs currently available, while optimizing cylinder weight and shipping costs..

The aluminium alloy used in MCA cylinders is used in the aviation and space industries, ensuring low weight with very high strength and high hardness.

We recommend making cylinders in the new technology for cylinders over 120T, which ensures a weight reduction of nearly 50%, facilitating assembly, disassembly, use of the cylinder and its storage.

Technical details

The new technology retains all the most important parameters of the standard technology:

- \rightarrow Corrosion-resistant body
- Magnetic force maintained throughout the product life cycle
- \rightarrow Hardened raceways with a hardness above 60HRC
- ightarrow Possibility of cylinder regeneration
- \rightarrow Easier assembly of flexible die thanks to the mounting line
- $\rightarrow\,$ Possibility of making additional pins for additional protection against displacement
- \rightarrow axial runout precision -0.01mm (-0.0004"), cylinder gap
- → 0.003mm (0.0001")
- Fast delivery time

Diameter up to 360 mm (14") Total length up to 2000 mm (79") Total weight up to 300 kg (661 lb)

IMAG Magnetic Cylinders

IMAG Magnetic Cylinders have been designed to optimize cylinder performance in the most effective way. We guarantee:

Reduced weight that makes it easier to set up the machine and as a result shortens the time required to prepare for work.

Light construction, which allows extending the life of the cylinder and gear. This also reduces the load on the machine components and associated tools.

Reduced risk of damaging the magnetic part as a result of hiding delicate magnets inside the body.

Anodized surface that gives protection against scratching of the cylinder surface.

Savings related to lower transport costs and lower energy consumption due to the reduced weight.

Technical details

Body

- ightarrow The body is made of aluminum
- ightarrowAnodized Housing
- ightarrow Coating hardness around 500HV
- ightarrow Magnets placed internally

Bearers

ightarrow Hardened cylinder bearers with a hardness of 60 +/- 2HRC

Gears

- \rightarrow Standard
- ightarrow Standard, hardened
- ightarrow Hardened and ground

Advantages

- \rightarrow Cylinder weight reduction.
- ightarrow Hiding the magnets inside the cylinder.
- ightarrow Protection of the surface against scratching.
- ightarrow Optimizing the performance of the tool.

CRO Sleeve Glass Fiber Print Cylinders

Composite Rotometal Sleeves (CRO) are ultra-light Printing Cylinders.

Using the latest composite production techniques, we produce our sleeves from the composite itself or composite with an aluminum layer. This allows the use of other materials such as PET, Polyurethane, Polyester or very durable epoxy resins.

Technical details

Base layer

- ightarrow Made of glass material and epoxy resin
- ightarrow High thermal resistance
- ightarrow High dimensional stability
- ightarrow The possibility of placing additional information

Compensating layer

- ightarrow Vulkollan, extremely resistant and resilient
- ightarrow Fast shape recovery, up to 60% energy return
- ightarrow Protected with a layer of reinforced resin

Layers responsible for the behavior of the sleeves during application on the mandrel

Technical details

Layers responsible for weight reduction and surface life:

Volume layer

- ightarrow Honeycomb, PET or XPS materials
- \rightarrow High thermal and chemical resistance
- ightarrow Closed volume less resin
- ightarrow Reduction of weight

Outer layer

- ightarrow Glass material saturated with colored resin
- ightarrow Possibility of making any color
- \rightarrow High hardness 80-90ShD and dimensional stability
- ightarrow High mechanical resistance

Improvement of product life

Special lock

- ightarrow Milled
- ightarrow Fixed using adhesive
- ightarrow The fasteners hide under protective rubber

Safety rubber

- ightarrow Outer diameter perfectly matched
- ightarrow High mechanical resistance
- ightarrow Aluminum products can be protected

CRO Sleeve ANTISTATIC Print Cylinders

ANTISTATIC cylinders have been designed to be the best print cylinder for solvent inks.

Using the latest production techniques we produce our sleeves with a base composite layer with an ANTISTATIC carbon coating. This coating has excellent conductivity that has been independently verified by a registered body. This combination means our CRO Sleeves GF ANTISTATIC are recommended and designed for solvent inks

Technical details

Base layer

- ightarrow Made of glass material and epoxy resin
- \rightarrow High thermal resistance
- \rightarrow High dimensional stability
- \rightarrow The possibility of placing additional information

Compensating layer

- ightarrow Vulkollan, extremely resistant and resilient
- \rightarrow Fast shape recovery, up to 60% energy return
- ightarrow Protected with a layer of reinforced resin

Layers responsible for the behavior of the sleeves during application on the mandrel

Technical details

Layers responsible for weight reduction and surface life:

Volume layer

- ightarrow Honeycomb, PET or XPS materials
- \rightarrow High thermal and chemical resistance
- ightarrow Closed volume less resin
- \rightarrow Reduction of weight

Outer layer

- ightarrow Custom ANTISTATIC carbon coating
- \rightarrow Surface conductivity value <10^5 Ohm
- ightarrow Value of cross conductivity <10^6 Ohm
- ightarrow Safety certified by an independent accredited body
- \rightarrow Colour Steel Blue

Safety rubber

- \rightarrow Outer diameter perfectly matched
- ightarrow High mechanical resistance
- ightarrow Products can be protected

Antifriction Print Cylinders

ANTIFRICTION means greater efficiency and productivity at the plant level.

Rotometal has developed a new method for hardening printing cylinders: ANTIFRICTION. It is a breakthrough solution that optimizes the friction properties and smoothness of the coating thanks to the use of the Polimeroxid®matrix, which is cross-linked with a special LF4 polymer over the entire thickness section.

The use of this innovative method in the production of our printing tools has resulted in exceptional surface smoothness while maintaining high hardness, around 450 HV, depending on the aluminum alloy used.

This pioneering solution has enabled us to produce tools with unprecedented performance properties, which, by combining high strength and optimal grip, distinguish us from other suppliers.

Preparing the cylinder for work has never been easier. Thanks to the ANTIFRICTION coating, the foam tape fixing the polymer sheets is easy to change and takes much less time.

ROTOMETAL

Technical details

- \rightarrow Completely new Polymeroxid® matrix
- ightarrow High surface smoothness
- ightarrow Coating hardness around 450HV
- ightarrow Optimal foam adhesion

HARD ANODIZED-CO BASIC MATERIALS

ightarrow Quick foam replacement without adhesive residue on the cylinder surface

HARD ANODICED ALLMINIC LP-POUNDR

Magnetic Cylinders

The use of the highest quality materials and the most modern CNC machines, which combined with many years of experience guarantees you the highest quality and precision of workmanship.

Our Magnetic cylinders are manufactured to a high quality standard that assures accuracy and consistency of the final product. Body made from nonmagnetic stainless steel provides an excellent protection against corrosion, does not deprive the strength of magnet power and enables high and equal adhesion of flexible die during use. Bearers made from high quality tool steel hardened above 60 HRC ensure long term and trouble-free performance. Optimum grip of flexible die is obtained by using ferrite magnets. For special jobs and better adhesion, strong neodymium magnets are recommended as an alternative or additional option. The light weight of the magnetic roll is also possible when the body is made from aluminum or is hollow inside. Minimum gap size tolerances guarantee the highest precision of cutting.

Technical details

- ightarrow The cylinder body is made of high-quality, non-magnetic stainless steel for long-term corrosion protection
- ightarrow Hardened bearers for hardness over 60 HRC ensure long life during use
- $\rightarrow\,$ High punch adherence due to the use of special ferrite magnets to increase the attraction force
- ightarrow It is possible to use neodymium magnets
- $\rightarrow\,$ At the customer's request, to reduce weight, the body can be made of aluminum or hollow inside
- ightarrow Possibility of cylinder regeneration
- $\rightarrow\,$ Mounting line on the body to facilitate the assembly of the flexible die
- $\rightarrow\,$ Possibility to install pins for additional protection against displacement of the die
- ightarrow Precision -0.01mm (-0.0004") axial runout, 0.003mm
- ightarrow (0.0001") cylinder gap Fast delivery time

Diameter up to 360 mm (14") Total length up to 2000 mm (79") Total weight up to 300 kg (661lb)

Anvil Cylinders

Anvil cylinders made of hardened tool steel. In order to achieve the highest manufacturing accuracy, these cylinders are manufactured on the most modern CNC machines.

Rotometal supplies Anvil Cylinders as well as Support Rollers made from high quality tool steel. Depending on the customer needs, it can be induction hardened or through hardened up to 62 +/-2 HRC. Anvils can also be made as plus or minus cylinders to compensate for the difference in material thickness. Highest precision of execution ensures best possible pressure parameters, increases the lifetime, reduces the wear of dies, plates and press. Short manufacturing lead time.

Technical details

- ightarrow At the customer's request, there is a possibility of induction hardening or through-hardening
- ightarrow Guaranteed hardness of 62 +/- 2 HRC
- $\rightarrow\,$ The possibility of making a variable diameter of the working surface

Sheeter (cross cutter)

Sheeters for perforating, cutting and kiss cutting. The tools are supplied with replaceable hardened blades

Our removable blade sheeters are precisely manufactured with CNC machinery to guarantee high center-to-center and square accuracy in order to provide best cutting effect. Two types of blades – for cutting and perforation - to suit different requirements. On customer request the slots can be located at equal or special position around the roll.

- Quick and easy blade replacement
- Exceptional manufacturing precision and accuracy
- High quality of cutting and perforation
- Fast setup time
- Wide range of cutting blades available

Technical details

- \rightarrow Two types of replaceable knives available for cutting or for perforation
- ightarrow Arrangement of knives tailored to customer requirements

ROTOMETAL we are for print

Embossing Cylinders

Rotometal embossing cylinders make full use of all the advantages of the embossing technique. This consists of, in essence, squeezing the material between two hard forms - named male and female.

Our cylinders are produced for the method of cold embossing, i.e. creating a three-dimensional pattern in the embossed material by squeezing a die / matrix in order to emphasize the previously printed pattern, e.g. an inscription, logo or a decorative element.

An additional advantage of Rotometal embossing cylinders is that the pressing takes place at the ambient temperature.

Print Cylinders

Our print cylinders are made of special aluminum material or steel. The working surface can be anodized to protect it from scratching.

Our print cylinders are made of special aluminum material or steel. The working surface can be anodized to protect it from scratching. The plate cylinders can be made of tube to reduce the weight. All cylinders are supplied with standard gears, but for better quality of print we can also supply it with hardened and ground gear. Rotometal manufactures printing cylinders for all flexo machines.

High accuracy

Scratch proof

Horizontal and vertical guide lines for easy plate assembly

Short manufacturing lead time

Repair service on customer request

Technical details

- ightarrow Made of aluminum or steel
- ightarrow The cylinder surface can be anodized, making it less susceptible to mechanical damage.
- ightarrow The cylinder can be equipped with standard or hardened and ground gears to ensure high quality printing.

ROTOMETAL

CRO Sleeve Aluminium Print Cylinders

In our product range, modern sleeve print cylinders can also be found. These cylinders can be produced using aluminum as a working surface. The surface can be supplied as a standard or with an anodized finish. Easy and fast assembly, high working precision are very good arguments for using them. Less waste during the mounting of plates, better adhesion of the tape and reduced weight are also their advantages.

Technical details

- ightarrow Easy and fast assembly on air mandrel
- ightarrow High durability inner core
- ightarrow Light construction

Anilox Sleeve Base

Maximum length - 1800 mm (71") Diameter from 1800 mm (3") to fi-200mm (8") Lightweight construction Easy assembly and disassembly Working pressure 6-8 bar

The base for the anilox sleeve is finished with stainless steel rings for better corrosion protection.

Air Cylinder

Air cylinders with an air adapter for applying rubber sleeves and sleeve printing cylinders. This solution allows you to work on the entire surface of the rubber sleeve and print endlessly.

Rotometal offers different kinds of tint kits for varnishing and other applications. The installation of the rubber is quick and easy. There are two collar rings to secure the rubber sleeve in position. This solution allows it to work on the entire surface of a rubber sleeve and enables an endless printing.

Technical details

- ightarrow Work with a wide range and lengths of rubber sleeves
- ightarrow Available also with adaptor for easy air supply
- ightarrow Quick and efficient cylinder assembly
- ightarrow Covers wide range of applications

Rubber Coated Cylinder Base

Rotometal offers bases for rubber coated cylinders.

Bases for rubber coated cylinders also known as varnishing cylinders, lacquering cylinders can be supplied for vide range of machines. The base cylinder can be made from steel or aluminum with various types of gears upon customer request.

 $\begin{array}{l} \rightarrow \\ \text{High precision workmanship} \\ \rightarrow \\ \text{Fast delivery time} \end{array}$

27

End rings

We offer End rings made of aluminum in the standard or anodized version.

We supply End Rings made from aluminum in a standard or hard anodized version. Application of modern manufacturing technology enables us to provide the highest quality of this product. Available for almost all types of screen printing cylinders.

Technical details

- ightarrow Available for most machines
- ightarrow Different designs depending on the type of machine
- ightarrow Short delivery time

Bearing housing

Bearing housing are an indispensable element of a magnetic cylinder, anvil, support cylinder, embossing cylinder or knife sheeter

Gears

We supply a variety of gears which are typically produced from steel, although other materials are also available.

We can supply a variety of gears which are typically produced from steel, although other materials are also available. Helical or spur teeth gears can be offered in standard quality and also hardened and ground to reduce the noise, eliminate backlash problem and to ensure high quality of print. On customer request the product can be customized to ensure individual requirements.

Technical details

Possibility to use different materials

High precision of execution allowes the use in the latest machines

Hardened and ground gears in print cylinders guarantee the highest print quality

Cutting Units

Perfect solution for small production and samples. Can be used as an additional module in existing machines.

Perfect solution for small production and samples. Can be used as an additional module in existing machines. Equipped with a Rotoset pressure control system. Different working widths and rotary tooling configuration. Manually or mechanically operated. The frame can be made from steel or aluminum. Designed to individual customer needs and expectations.

Technical details

- ightarrow Width, configuration tailored to individual customer needs
- \rightarrow All elements made using high quality CNC machines
- ightarrow Can be installed as an additional machine module
- ightarrow Body made of aluminum or steel

Rotosetcontrol

Pressure gauges to regulate and monitor cutting pressure for rotary cutting tools. These ensure an efficient and controlled process for all cutting, notching or perforation tasks.

This easy-to-use system allows machine operators to monitor the force applied to the punching tools on easy-to-read gauges. The height of the set screw can be easily adjusted immediately after changing jobs with the quick-latch system. The working range of the manometer is max 160 bar. To meet our customers' expectations, it is possible to use pressure gauges with a reading in kN (max 12.5 kN). We can supply a gauge system that can be retrofitted to most die cutting stations.

Available for most machines

 \sim

 \sim

Various designs depending on the type of machine

Reduces wear and damage to cylinders and flexible dies caused by the application of excessive pressure

Mobile Cylinder Rack

Rotometal supplies advanced storage solutions which make cylinder racking easy and convenient.

Cylinder storage rack is a safe and cost effective solution which protects the tools from accidental damages, maximize machine operator safety in the workplace and help organize working areas. Recommended for use where cylinders may be exposed to any possible equipment collisions. Available in standard and custom design for various machine configurations. Designed for safe and efficient storage and transportation. Allow the staff to work more efficiently by transporting more cylinders in one journey. Heavy duty rotating rubber wheels make it easy to maneuver, provide floor and cylinder protection and ensure safe movement.

- \rightarrow Safe movement of cylinders
- \rightarrow Easy access to the cylinders
- \rightarrow Easy identification of cylinders
- \rightarrow Can be set up for various sizes
- \rightarrow Safe movement of multiple cylinders up to 4 sets of 10 cylinders with bearers
- \rightarrow Easy identification of various cylinder sizes
- \rightarrow Can be set up for various sizes
- \rightarrow Easy access to the cylinders

Stationary Cylinder Rack

Stationary storage racks are recommended where cylinders may be exposed to any possible damages caused by equipment collisions in a workplace.

This solution makes the cylinder racking easy and convenient. Wall mounted cylinder rack allows permanent designation of appropriate cylinder storage area. Modular construction enables simple and easy adjustment for various cylinder sizes depending on machine type.

- \rightarrow Two-level construction including mobile rack
- \rightarrow Safe movement of multiple heavy cylinders
- \rightarrow Can be set up for various sizes
- \rightarrow Easy access to the cylinders
- \rightarrow Safe storage of multiple cylinders for various machine types
- \rightarrow Can be set up for various sizes
- \rightarrow Easy identification of cylinders
- \rightarrow Easy access to the cylinders
- \rightarrow Modular construction
- \rightarrow Custom design
